

ASSESSMENT REPORT 2019

Union Bancaire Privée, UBP SA

INTRODUCTION

The Assessment report is designed to provide feedback to signatories to support ongoing learning and development.

A brief description of the each section of this report and how it should be interpreted is provided below. The high-level assessment methodology can be found here and a companion document explaining the assessment of each indicator can be found here

ORGANISATIONAL OVERVIEW

This section provides an overview of the main characteristics of your organisation. This determined which modules and indicators you reported on and determines your peer groups.

SUMMARY SCORECARD

This section provides an overview of your aggregate score for each module and the median score. These bands range from 'A+' (top band) to 'E' (lowest band).

ASSESSMENT BY MODULE

For each module you reported on, you will see a section that shows your:

- Year-on-year performance
- Indicator scorecard
- · Section scores
- · Comparison to peer groups

PUBLISHING IN THE DATA PORTAL

Assessment Reports and private Transparency Reports are confidential and only accessible to the reporting signatory on the Data Portal.

However, the Data Portal does facilitate signatories to share these reports bilaterally with other signatories.

To request access, use the "Find A Report" tab to search, and click "Request access". To check pending requests on your own reports, go to "Settings and Requests" tab. Your nominated Data Portal Contact can approve or decline requests.

PUBLICATION GUIDELINES

It is permitted to publish your Assessment Report outside of the Data Portal, however you must take every care not to represent scores out of context, and include access to or references to: the PRI assessment methodology; your full Assessment Report (if only a section is published); and your Transparency Report.

Assessment Reports are the intellectual property of PRI. Third party organisations who have accessed assessment reports outside of the Data Portal and intend to use assessment reports require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to.

In no case, can this report or any content of it be sold to other parties.

PRI DISCLAIMER

This document is based on information reported directly by signatories. Moreover, the underlying information has not been audited by the PRI or any other party acting on its behalf. While every effort has been made to produce a fair representation of performance, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for damage caused by use of or reliance on the information contained within this report.

YEAR ON YEAR PERFORMANCE

These charts show the trend in your module band over the last three years, and also shows the trend across the average of all reporting signatories.

INDICATOR SCORECARD

Your indicator scorecard summarises the scores you achieved for each assessed indicator within each module.

These will range from zero stars to three stars. It also provides basic information about the performance of your organisation compared with other signatories that responded to that indicator. The number of stars determines your overall module score. Please refer to the assessment methodology summary for additional information about how these scores are calculated.

PEER COMPARISON

Your total aggregated performance band for each module will be compared against your peer groups in a series of distribution charts.

Organisational Overview

This section provides an overview of your organisation. These characteristics are used to define your peer groups.

MODULE OVERVIEW

The table below provides an overview of your Listed Equity Incorporation Band as well as your scores for Screening and/or Integration strategies. You receive a single score for this module, which is based on your main incorporation strategy, calculated using your reported information in indicator LEI 03. Both the Screening and Integration scores, if applicable, are presented in more detail in the following pages. Thematic approaches are not scored.

Module Band	В

MODULE OVERVIEW

The table below provides an overview of your Listed Equity Active Ownership Band. This is based on your score for engagement and (proxy) voting.

If applicable, you will see a separate score for engagements run internally, collaboratively and through service providers. Your engagement score is based on your main engagement approach, calculated using your reported information in indicator LEA 11. Your main approach is based on the combination of the quantity and comprehensiveness of engagements and your role/involvement. The Engagement score is not dependent on how you conduct your engagements and the top score can be achieved regardless of who conducts the engagements. For more information please see the assessment methodology and detailed methodology.

The scores for each applicable engagement approach are presented in more detail in the following pages.

PRIVATE RI REPORT

2019

Union Bancaire Privée, UBP SA

About this report

This report is an export of the individual Signatory organisation responses to the PRI Reporting Framework during the reporting period specified above. It shows your responses to all completed indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders. The PRI will **not publish** this report on its website. Instead, you will be able to access the public RI Transparency report of your organisation and that of other signatories on the PRI website.

The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

Confidentiality and sharing via the Data Portal

Private RI Reports are confidential and only accessible to the reporting signatory via the Reporting Tool and on the Data Portal.

However, the Data Portal does facilitate signatories to share these reports bilaterally with other signatories.

To request access, use the "Find A Report" tab to search the relevant report, and click "Request access". To check pending requests on your own reports, go to "Settings and Requests" tab. Your nominated Data Portal Contact can approve or decline requests.

It is permitted to publish your Private RI Report outside of the Data Portal. Private RI and RI Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Private RI reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Indicate the total assets at the end of your reporting year subject to an execution and/or advisory approach.

Assets under execution and/or advisory only services

78,678,000,000 CHF

79,053,462,927 USD

Additional information. [Optional]

In 2018 UBP enlarged the coverage of its Responsible Investment policy to include not only UBP's Asset Management division's assets but also to directholdings managed by UBP's Private Bank Discretionary Service. The AuM at the end of the reporting year, reported in Section 04.2, has consequently increased from circa CHF 40 billion to CHF 50 billion

Responsible investment processes

☑ Provide training on ESG incorporation

g on 200 moorporation

Deepening of the UBP's ESG knowledge

Progress achieved

Throughout 2018 some members of our ESG Committee undertook dedicated ESG training with the University of Zurich and completed EFFAS CFESGA

- ☐ Provide training on ESG engagement
- f Z Improved communication of ESG activities within the organisation

Key performance indicator

Improve ESG awareness within the Bank and with the investment teams.

Progress achieved

With the rolling out of UBP's enhanced RI policy in early 2018, a strong and coordinated communication was deployed across UBP to explain and sensitise employees to the concept and rational of ESG and Sustainable Investing.

In November 2018 a Q&A/Talking Points on UBP's Responsible Investment Strategy was disseminated across the Bank.

Several internal presentations were held during our 2018 quarterly sales meeting (audience: 100 to 130 persons) focusing on ESG integration.

UBP's intranet was progressively updated with our advances in ESG.

Reviewing of marketing materials to put more emphasis on ESG considerations within our product range.

Additionally, meetings held with the Wealth Management teams in order to get their buy in and to extend the scope of UBP ESG initiatives.

The enhanced 2018 RI policy created a point-person within each investment team. The point-persons are responsible for circulating information from the ESG Committee / Responsible Investment Committee (RICO) to their investment team, while also informing the ESG Committee / RICO of engagement with companies and proxy voting decisions if contrary to the recommendations.

☑ Improved engagement to encourage change with regards to management of ESG issues

Key performance indicato

Moved from Standard to Sustainability voting policy

Progress achieved

Wanting to place greater emphasis on ESG, during 2018 the ESG Committee took the decision to adopt ISS Sustainability voting policy. This took effect as of 01.01.2019.

The Sustainability guidelines focus on long-term economic value preservation/enhancement through promotion of corporate governance best practices that mitigate risks to shareowners, but also reflect the recognition that ESG factors could present material risks to portfolio investments.

☑ Improved ESG incorporation into investment decision making processes

Key performance indicator

Increase usage of ESG indicators in portfolio management. Extended Exclusion List. Introduction of Watch List and Inclusion List

Progress achieved

Following our partnership with an ESG service provider in 2017, throughout 2018 their ESG tool with increased functionality was deployed.

The 2018 enhancement of RI policy enlarged the policy's scope to extend to UBP Private Banking division's Discretionary and Advisory recommendations.

In addition to controversial weapons, the Exclusion List was enlarged to companies which generate significant revenue streams through nuclear weapons and thermal coal.

Further the Watch List and Inclusion List were established.

- The Watch List includes those companies "red-flagged" by the ESG data provider. The Watch List is not an exclusion list. Investment Centres are challenged by the ESG Committee or the RICO, and have to justify on a quarterly basis the inclusion of these stocks / issuers in their portfolios as well as indicate engagement with the company aiming to improve its ESG practices.
- The Inclusion List consists of "ESG champions" of companies with good ESG practices. The resulting list is global, cross-asset classes but does not make judgements on valuation i.e. it does not constitute a direct investment recommendation. However, Investment Centres are encouraged, where appropriate, to consider this list in their investment decisions.

	Key performance indicator
	Increase involvement in RI initiatives
	Progress achieved
	Throughout 2018 UBP was involved in numerous initiatives including:
	 A collaboration with the Cambridge Institute for Sustainability Leadership. This partnership sees UBP join the exclusive Investment Leaders Group, a select network of pension funds, insurers and asset managers committed to advancing the practice of responsible investment.
	 In early 2018, UBP entered into a partnership with Sustainable Finance Geneva (SFG), an association that is renowned as a key glob platform in sustainable finance in French-speaking Switzerland In May 2018, UBP was a signatory of the letter "2018 Global Investor Statement to Governments on Climate Change", an initiative developed by The Investor Agenda: Accelerating Action for a Low-Carbon World.
	 As of October 2018, UBP became a member of Swiss Sustainable Finance (SSF). SSF has as mission to strengthen the position of Switzerland in the global market place for sustainable finance by informing, educating and catalysing growth.
	Encouraging others to join a RI initiative
_	Documentation of best practice case studies
	Key performance indicator
	Impact investing best practice
	Progress achieved
	In September 2018, UBP launched its first impact fund, UBAM - Positive Impact Equity. Prior to this, the investment team responsible for th product spent much time researching best-practice for impact investing with other investment houses, CISL and other external parties.

SG 07.4 Additional information. [Optional]

In addition to the ESG Committee, UBP Responsible Investment Committee (RICO) is composed of the 2 co-CEOs of UBP's Asset Management division, the COO of Institutional Clients unit of the Asset Management division, the Responsible Investment Officer, a representative of Private Banking Sales Management and one of the UBP Asset Management (Europe) S.A., which act as the Management Company to our Luxembourg domiciled funds, Conducting Officers. The RICO undertakes the strategic decision-making and is responsible for the action plan, regular reviews and assessment of actions, ensuring resources are allocated adequately and that reporting duties are properly carried out. Moreover, the RICO is the ultimate authority in case of disputes over the policy or its application.

UBP's dedicated Responsible Investment Officer is responsible for the oversight and the proper implementation of UBP's Responsible Investment policy.

		Brief description and measures of investment	
		UBP manages strategies for which ESG factors play an even more prominent role:	
		UBAM Convertibles Europe SRI: A UCITS compliant Fund domiciled in France, invests in European Convertible Bonds with a bes	t-in-
		class approach to ESG considerations. UBAM Convertibles Europe SRI was awarded the "Österreichisches Umweltzeichen" Aust eco-label in May 2017, which guarantees investors that the SRI process is demanding and transparent.	
		UBAM - EM Sustainable High Grade Corporate Bond: A UCITS compliant sub-fund of the Luxembourg domiciled UBAM, invests emerging market high grade bonds issued by EM corporate issuers that have demonstrated better ESG conduct than their peer defined climate targets and that are not involved in very serious controversies or controversial weapons.	
		UBAM - Positive Impact Equity: An actively managed, concentrated, long-only equity fund that invests in companies with product and / or services that aim to deliver positive social and environmental impact. The sub-fund targets superior financial returns by investing in those companies deemed to be making a significant effort in addressing, and therefore well positioned to capitalise	
		the global commitment to achieving the United Nations' 17 Sustainable Development Goals (SDG) and the wave of capital require address the world's most pressing challenges.

Measures No specific measure Provide examples of how ESG issues have been addressed in the manager selection, appointment and/or monitoring process for your organisation during the reporting year. ✓ Add Example 1 Topic or issue Implementation of Exclusion List Conducted by Internal staff Asset class Listed Equity Following the 2018 enhancement of UBP's RI policy, all externally managed UBP products were required to respect UBP's Scope and Exclusion List. process Exclusion List has been applied to approximately extra CHF 1 billion of assets. Outcomes Add Example 2 Topic or ESG / SRI integration into third-party funds Conducted Internal staff Asset All asset classes class As part of UBP's determination to enlarge the scope of assets covered by our RI Policy, for UBP's Private Banking Discretionary Management and Advisory services, our Multi-Manager Fund Research team has developed a specific ESG due diligence in order to Scope and analyse the incorporation of ESG into third-party funds on our approved list. The objective is to have part of the approved list process dedicated to funds with superior ESG credentials. Outcomes This is a work in progress. Already some investment providers and funds have been identified with superior ESG credentials. ✓ Add Example 3 Topic or ESG issue example with a third-party manager (2018) Conducted Internal staff Asset class Listed Equity For a Japanese fund, we immediately and proactively escalated the Nissan's issue when the CEO was arrested without waiting for the external manager answer. Scope and process On its side, the external manager was already in the process to decrease the "G" overnance scoring of the company which was followed by a significant decrease of the position in the portfolio. This example shows that both sides (external and internal staff) actively work to make sure the portfolio complies with ESG Outcomes guidelines. Add Example 4 Topic or issue Implementation of Watch List Conducted by Internal staff Asset class For all external managers of UBP products we furnish them with UBP's Watch List of companies embroiled in controversies Scope and process External managers are aware of those companies that we consider could put performance at risk due to ESG factors. Outcomes ☐ Add Example 5

29 TRANSPARENCY

☐ Add Example 6
☐ Add Example 7

☐ We are not able to provide examples

The Convention on Cluster Munitions, The Ottawa treaty on land mines, The Chemical Weapons Convention and environmental conventions.

Description

UBP's Exclusion List is based on international norms such as the Convention on Cluster Munitions, the Ottawa treaty on land mines and the Chemical Weapons Convention. UBP wants to be proactive when research suggests that companies' involvements in any ESG controversies represent a potential threat to their long-term forecasts. The Exclusion List also takes into account the growing concerns in is climate change, especially following the 2014 Montreal Carbon Pledge and 2015 Paris Agreement.

The Watch List includes those companies "red-flagged" by our ESG research provider alert, companies that have been "red-flagged" in an instance or ongoing situation in which company operations and / or products allegedly have a negative ESG impact. The Watch List is not an exclusion list. Investment Centres are challenged by the ESG Committee or the RICO, and have to justify on a quarterly basis the inclusion of these stocks / issuers in their portfolios as well as indicate engagement with the company aiming to improve its ESG practices.

LEI 04.2 Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.

The Bank systematically communicates any changes of the Exclusion List to all employees. It is the responsibility of our Client Relationship Managers to communicate changes to the clients and / or beneficiaries.

☑ ESG factor 1

ESG factor and explanation

A company that provides active ingredients that go into the markets of personal care (skin/hair/sun care & cosmetics), life sciences (agrochemicals & excipients) and performance technologies (lubricants, polymer additives, resources & coatings) was analysed through UBP's IMAP scoring system resulting in superior ESG credentials compared to its peers, with attractive valuations.

ESG incorporation strategy applied

Impact on investment decision or performance

Decision to invest into company across a couple of public funds.

SESG factor 2

ESG factor and explanation

Fundamental company analysis by a UBP investment team revealed that our ESG service provider had an inaccuracy in their data.

ESG incorporation strategy applied

Impact on investment decision or performance

Engagement with the ESG service provider who amended their data.

☑ ESG factor 3

ESG factor and explanation

Analysis revealed that contents issues in a social media company would result in future slowing growth and rising costs.

ESG incorporation strategy applied

Impact on investment decision or performance

Position was sold

S ESG factor 4

ESG factor and explanatio

The Global Emerging Market Equity team owned a Polish utility company on the basis of its cheap valuation and good quality characteristics. This has been one of the team's 3 Polish holdings over the past 2 years. At the time of purchase, the team was already worried by the government's influence on the management of the company and the presence of some generation projects that used coal as a primary fuel. Since then, the situation has deteriorated and the company has decided to go ahead with a large project that represents a set-back in terms of managing carbon emissions as it will see the creation of a 1000MW coal-fired power plant. It still is a profitable company with solid earnings that ranks well on our financial screens but the team has decided to divest due to the lack of concern by the company for ESG issues.

ESG incorporation strategy applied

Impact on investment decision or performance

Impact: Decision to divest

☑ ESG factor 5

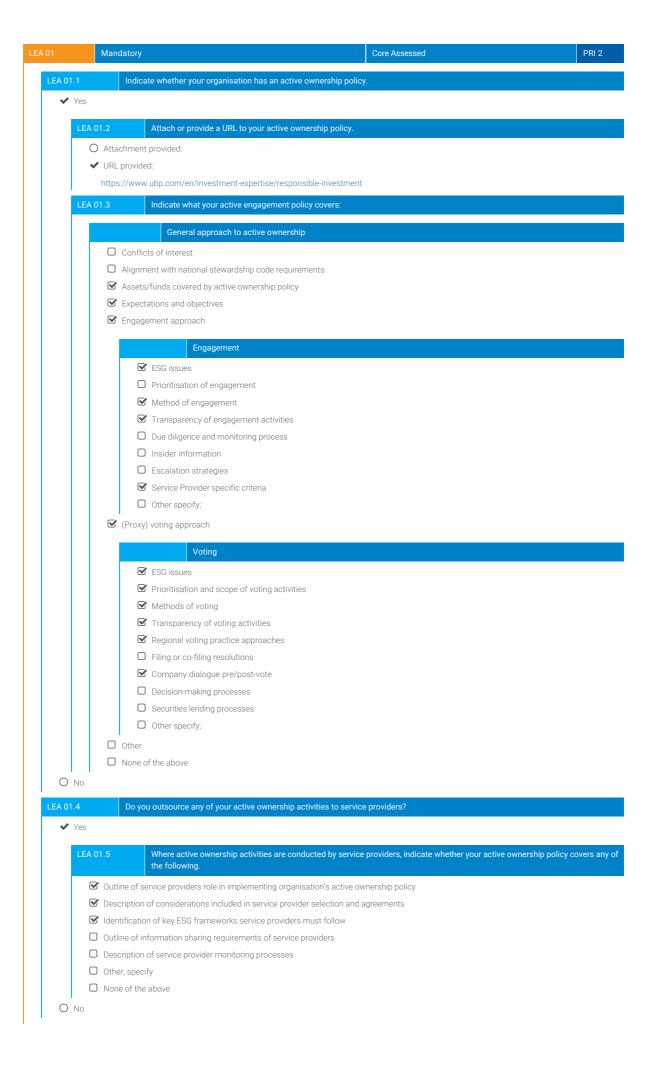

ESG factor and explanatior

Indonesia is a country we have maintained as an overweight in the last few years in our Global Emerging Equity fund. It ranks very well on our country model that takes into account valuation, earning and price momentum, and macro as well as currency characteristics. That said, many of the stocks that are highlighted by our financial screens have to be disregarded due to ESG considerations. Of the 6 stocks at the very top of our screens: 2 are on the Group's exclusion list due to their thermal coal activities and 1 has been excluded by the team following an ESG review, as the shortcomings in that area were significant enough to deserve a divestment. For that reason, we have not found enough candidates to maintain a larger position in Indonesia. The lack of companies with good ESG credentials has tempered our enthusiasm for the Indonesia market.

ESG incorporation strategy applied

Impact on investment decision or performance

Smaller position on a market than we would otherwise have had

Engagement

To maximise the influence of its engagement activities, UBP relies on a third-party engagement service provider, Sustainalytics. Sustainalytics is a leading global engagement service provider specialising in collaborative engagement. This partnership is essential in facilitating the implementation of our RI policy and achieving durable change in the selected companies.

Sustainalytics engages with companies after performing a systematic assessment of companies' compliance with international conventions (e.g. UN Global Compact, OECD Guidelines for Multinational Enterprises, Environmental conventions, etc).

While most engagement programmes are carried out by Sustainalytics, UBP analysts and portfolio managers are encouraged to engage formally or informally on relevant matters with the management of companies in the course of their fundamental research.

Proxy Voting

UBP has decided to exercise voting rights through Institutional Shareholder Services (ISS), an industry leading third party voting service provider. ISS offers global coverage of the securities markets and provides us with accurate information regarding investee companies, including the agenda of the meetings and all the research material needed to assess the items to be voted upon. ISS offers a central hub for managing all the votes and providing operational, record keeping and reporting services.

Our voting policy aims to achieve two primary objectives:

To act in the best financial interests in order to enhance the long-term shareholder value, and

To promote best ESG practices (including sound corporate governance), which in turn will help the company to be successful. Core Assessed PRI 1,2,3 LEA 02.1 Indicate the method of engagement, giving reasons for the interaction Type of engagement Reason for interaction ☑ To influence corporate practice (or identify the need to influence) on ESG issues ▼ To encourage improved/increased ESG disclosure Individual / Internal staff engagements f Z To gain an understanding of ESG strategy and/or management $\ \square$ We do not engage via internal staff ☑ To influence corporate practice (or identify the need to influence) on ESG issues ▼ To encourage improved/inreased ESG disclosure Collaborative engagements ☑ To gain an understanding of ESG strategy and/or management ☐ We do not engage via collaborative engagements To influence corporate practice (or identify the need to influence) on ESG issues ▼ To encourage improved/increased ESG disclosure Service provider engagements ☑ To gain an understanding of ESG strategy and/or management ☐ We do not engage via service providers Indicate whether your organisation plays a role in the engagement process that your service provider conducts. ✓ Yes

EA 02.4 Additional information. [Optional]

Our service provider's engagement process is based on the findings from systematic screening of companies regarding their compliance to current international conventions on ESG issues. Having access to all the research data, we regularly check the coverage and the relevance of engagement activities with regard to our investment activities.

Through our engagement service provider's regular reporting and also via its online tool, we check the progress on the different engagement programmes. Moreover, one of our equity teams continues to have regular meetings with our service provider to review all the portfolios and the engagement cases associated to them.

On some specific cases or for special thematics, we directly participate in the engagement actions our service provider conducts and collaborate with other investors in order to increase the impact of our engagement activity.

In 2018 our service provider sent out 810 e-mails / letters and held 50 meetings (22 face to face and 28 conference calls) with companies held in our

Additionally out of the 1'000 company visits by our investment teams annually, ESG-related topics are systematically touched upon, resulting in direct engagement in a 10 % / 20% of the cases.

1	Volunta	ry Descriptive PRI 2
EA 11.	.1 P	Provide examples of the engagements that your organisation or your service provider carried out during the reporting year.
V	Add Example 1	
	ESG Topic	☑ Sustainability reporting
	Conducted by	Individual / Internal
	Objectives	UBP's Europe Equity team engaged with a small Norwegian energy storage provider over the issue of disclosure. During a productive meeting, we learned that through their work with a UK supermarket client, this impact company had delivered an 80° reduction in the CO2 footprint of the retailer's vehicle fleet.
	Scope and Process	Together, we took this observation and worked on how to broaden it to a robust KPI that could powerfully illustrate the impact generated by this company's revenue streams.
	Outcomes	Company changed practice
S	Add Example 2	
	ESG Topic	☑ Labour practices and supply chain management
	Conducted by	Collaborative
	Objectives	Indonesian consumer staples company had labour rights issues, in particular over 40% of its agribusiness workers were still hire as non-permanent workers. As part of our engagement, we have therefore asked the company to come up with specific targets their subsequent Sustainable Palm Oil Policy.
	Scope and Process	To make sure that our voice was going to be heard, we not only asked Sustainalytics to start engaging with the company, but we also collaborated with part of a group of investors representing \$6.7 trillion in assets under management, that addressed the RSPO directly.
	Outcomes	Company committed to change
S	Add Example 3	
	ESG Topic	☑ Labour practices and supply chain management
	Conducted I	by Service provider
	Objectives	Sustainalytics engaged with Nestlé over a supplier that was reportedly abusing its workers.
	Scope and F	Process Direct engagement with management.
	Outcomes	Company changed practice
S	Add Example 4	
	ESG Topic	☑ General ESG
	Conducted I	by Individual / Internal
	Objectives	An investment team engaged with a company to better understand their strategy on controversial weapons.
	Scope and F	Process UBP's Swiss & Global Equity team liaised directly with the companies Investors Relations to clarify the details.
	Outcomes	Increased understanding / information
S	Add Example 5	
	ESG Topic	✓ Human rights
	Conducted by	Service provider
	Objectives	Engagement with a company in the European equity universe concerning operations in occupied territory. The company should demonstrate in accordance with the right to self-determination stipulated in the International Covenant or Civil and Political Rights and International Covenant on Economic, Social and Cultural Rights. Should this not be possible, the

Scope and Process

The company remains open to dialogues with our engagement service provider, nevertheless it considers its activities in the Western Sahara as compliant with international norms.

Outcomes

Ongoing

☑ Add Example 6

ESG Topic	✓ Anti-bribery and corruption
Conducted by	Service provider
Objectives	Company in our Swiss equity universe should ensure that the revised and updated anti-bribery policy is followed worldwide and at subsidiary level, and reflects the company's corruption risk exposure. Allocated resources, implementation, corrective actions, monitoring and external verification in relation to the policy should be communicated.
Scope and Process	4 meetings have been made with the company, and the company has put a number of measures in place in regard to its anti- bribery and corruption, the company rose in the 2018 Access to Medicine report 13 places in regard to compliance.
Outcomes	Company changed practice

✓ Add Example 7

ESG Topic	☑ Company leadership issues
Conducted by	Individual / Internal
Objectives	Following the passing away of its CEO, UBP wanted to get further transparency on how the new CEO had been selected for an Italian Company for which UBP had been a long-term investor.
Scope and Process	UBP sent a letter to the company, re-iterating its general support of the company as a long-term investor, and requesting that the company gave us more disclosure on how the new CEO has been appointed.
Outcomes	Ongoing

☐ Add Example 10

LEA 12 Mandatory Descriptive PRI 2

LEA 12.1 Indicate how you typically make your (proxy) voting decisions.

Approach

O We use our own research or voting team and make voting decisions without the use of service providers.

O We hire service provider(s) who make voting recommendations and/or provide research that we use to guide our voting decisions.

✓ We hire service provider(s) who make voting decisions on our behalf, except for some pre-defined scenarios where we review and make voting decisions.

Based on

 $\ensuremath{\checkmark}$ the service provider voting policy we signed off on

O our own voting policy

O our clients' requests or policies

O other, explain

O We hire service provider(s) who make voting decisions on our behalf.

LEA 12.2

Provide an overview of how you ensure your voting policy is adhered to, giving details of your approach when exceptions to the policy are made

Our voting policy applies across all our equity funds, bother internal and external, with an AUM > \$15 million. To be efficient and systematic we chose to rely on the services of a specialist service provider. In that context, our voting service provider supplies us with accurate information regarding the companies we invest in, including the agenda of the meetings and all the research material needed to assess the items to be voted upon.

In practice:

We can instruct the voting service provider to vote on our behalf as per their recommendations.

Our portfolio managers can consult the service voting provider recommendations and make their own decisions, under the supervision (involving a veto and a final decision right) of the relevant Management Company/ Fund's arbitration body, or according to client requirements. Exceptions are documented and agreed upon by the relevant fund's ManCo Conducting Officer or by the client.

As with all our relationships with third party providers, the fund manager is both expected and encouraged to "sense-check" recommendations.

In line with the bottom-up nature of our investment approach and autonomy of our investment centres, the approach varies across teams.

Of note, after a thorough review, UBP decided to upgrade its voting policy from Standard to Sustainability voting package as of 2019. The Sustainability guidelines focus on long-term economic value preservation/enhancement through promotion of corporate governance best practices that mitigate risks to shareowners, but also reflect the recognition that ESG factors could present material risks to portfolio investments.

	ESG Topic	♂ Company leadership issues
	Conducted by	Individual/Internal
	Objectives	UBP voted against the ISS proposal to vote in line with management recommendations with regards to independent directors on a Nigerian company's Board. UBP's view was that there should be a majority of independent directors on the Board for the management to be more transparent and responsive to the interests of minority shareholders.
	Scope and Process	UBP voted against ISS proposal and management recommendation.
	Outcomes	Voting
♂ A	dd Example 2	
	ESG Topic	☑ Executive Remuneration
	Conducted by	Individual/Internal
	Objectives	Overwrote the ISS recommendation to vote against the approval of the remuneration report, because we see the improvements which are being brought to the remuneration policy and prefer to welcome these rather than seek larger, perhaps un-applicable improvements
	Scope and Process	Overwrote ISS recommendation. Helped the AGM to approve the Compensation Report with 59.41% votes in favor.
	Outcomes	Voting
♂ A	dd Example 3	
	ESG Topic	✓ Company leadership issues
	Conducted by	Service provider
	Objectives	In a Spanish company's AGM ISS voted against new appointments to the board as account for less than 1/3rd of the board seats which is considered insufficient for a Spain-incorporated, controlled company.
	Scope and Process	ISS voted against the the proposal.
	Outcomes	Voting

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

Negative screening based on UBP's Exclusion List applies to all our fixed income funds as well as to direct holdings within UBP's Private Banking Discretionary Portfolio Management services.

Investment teams take into account UBP's Watch List of companies "red-flagged" as having controversies. Although the teams are not obliged to divest, they should justify the rationale for keeping said companies in their portfolios.

Those investment strategies that take a predominantly bottom-up approach take into consideration ESG factors as part of their process.

Other screening and integration strategies are applied on dedicated portfolios to meet client's investment guidelines and demands. In particular, for a specific set of mandates in the Emerging Market Fixed Income segment, ESG for SSA consists in screening the countries in order to avoid positions in those where corruption or inadequate public or environemental policies prevail.

UBP has two SRI public funds:

UBAM Convertibles Europe SRI invests in European Convertible Bonds with a best-in-class approach to ESG considerations with more stringent exclusion criteria.

UBAM - EM Sustainable High Grade Corporate Bond invests in EM high grade corporate bonds that have demonstrated better ESG conduct than their peers based on in-house and external analysis with more stringent exclusion criteria.

	Description of how ESG factors are used as the screening criteria
	Following the introduction of UBP's enhanced 2018 RI policy, and in particular the Watch List of companies "red-flagged" as involved in controversies, UBP's Fixed Income investment centres were required to justify any inclusion of companies in portfolios. Although this does not
	necessitate divestment across our portfolios, it does ensure that the investment teams take these ESG factors into consideration[WR1]. For UBAM - EM Sustainable High Grade Corporate Bond flagged companies are systematically removed from the portfolio.
	25/ W EW Substantiable Fight Grade Sorporate Bond hagged sorriganies are systematically removed from the portions.

	Description of how ESG factors are used as the screening criteria
	Following the introduction of UBP's enhanced 2018 RI policy, and aligned with growing concerns in climate change, especially following the
	2014 Montreal Carbon Pledge and 2015 Paris Agreement, all UBP public funds as well as direct holdings from UBP's Private Banking Discretionary Portfolio Management services divested from companies with 20% or more of their revenues from thermal coal extraction. These
	companies were also removed from our Private Banking Advisory services.

☑ Example 1

Corporate (non-financial)

ESG issue and explanation

During a road-show, UBP questioned where we were concerned with the low ratio of independent board members.

Engagement

Impact on investment decision or performance

This ESG issue meant that lower governance scoring was allocated to the company. Nevertheless this did not change the internal credit rating significantly therefore had little effect on investment decisions.

☑ Example 2

Corporate (non-financial)

ESG issue and explanation

For a company with average ESG credentials, we have favoured investments into their Green Bonds rather than traditional bonds.

Integration

Impact on investment decision or performance

The investment decision was impacted as we went into the companies Green bonds.

☑ Example 3

Corporate (non-financial)

ESG issue and explanation

A company in our convertible bond portfolios was increasingly lagging behind other players in the sector in terms of anti-corruption policy and measures to ensure the confidentiality and security of private data. In addition, the company had not sufficiently pro-active, with a general commitment to reduce its environmental impact and publishes no indicators to assess the evolution of its performance in this area.

Integration

Impact on investment decision or performance

The decision was taken to sell the holding in May 2018.

☑ Example 4

Corporate (non-financial)

ESG issue and explanation

With the introduction of the enhanced RI policy in 2018 the Exclusion List was extended to include companies which generate 20% or more of their revenues from thermal coal extraction.

Screening

Impact on investment decision or performance

 $\label{thm:bound} \mbox{UBP's Fixed Income public funds had to systematically sell the exposure to these companies.}$

☑ Example 5

SSA

ESG issue and explanation

Given our Exclusion Criteria via our screening we chose to exclude Turkey in the EM local SRI mandate at the beginning of 2018, based on Freedom House.

Screening

Impact on investment decision or performanc

The effect on performance was positive as measured by the SRI benchmark (which includes the top-level constraints) consequently outperformed the traditional EM debt benchmark.
